

Exploring the backyard in a new way: A Safari Adventure

Explore the great outdoors with a backyard safari! We have created a fun animal checklist for your little ones to use as they explore. The supplies you'll need on your mission are as followed:

- A printed Little Otter's safari checklist
- Five toy figures from the dollar store - Hippopotamus, Lion, Elephant, Rhinoceros, & a Crocodile
- A pencil to mark off the animals found on the safari

Summer is all about creating life-long memories with your family. Here are few more ideas to make your backyard safari an adventure your child will be sure to remember:

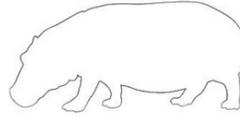

- Turn the safari game into an overnight experience by camping out in the backyard - some safari animals such as leopards are most active at night. This is a great opportunity to continue the educational fun.
- Don't forget the binoculars! Your child will enjoy the magnified perspective as they search for their safari pals all over the yard.
- Observing animals in their natural habitat can be a lot of work, be sure your little explorer has a canteen to stay hydrated while on their safari journey.
- Be Safe. We want to continue to teach children about safe practices no matter what the activity may be. For good practice when your family goes camping, teach your child how to blow a whistle and use a flashlight to find safety if they become separated from you.

We hope your family enjoys safari month as much as we do. Tag us @littleotterswim and #OtterSafaris to share your child's safari photos! We can't wait to see how many animals our swimmers will find.

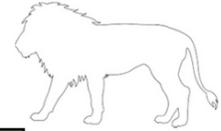

Animal Checklist

How many animals can you find on your safari?

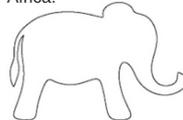

HIPPOPOTAMUS

With a name that means "river horse," hippos can easily outrun a human and are one of the most dangerous animals in Africa.

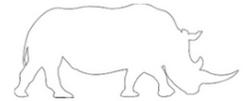

LION

Unlike other cats, lions are very social animals and live in groups, called prides, of around 30 lions.

ELEPHANT

Elephants are the largest land animals in the world and can live up to 70 years. Elephants are one of few mammals that can't jump.

RHINOCEROS

Their name means "nose horn." Rhino horns are made from keratin-the same substance fingernails and hair are made of.

CROCODILE

Crocodiles have lived on the earth since the time of dinosaurs. The largest species can reach 18 feet in length.

Safari Adventures

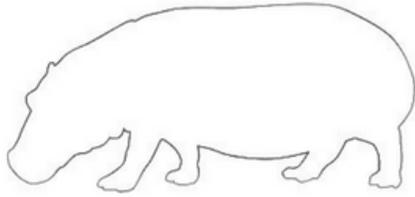

Once your little explorer completes their mission, you can cut out the Otter Badge.
